Dear Earl,

Just before leaving to have a hearing aid checked, with what you said in mind, I checked a manuscript that I believe has not been retyped. It wasn't. It would be a switch. A man who says he was an FBI agent blames the JFK assassination on the Dallas police. I defend the police and chop that phony scholar, who keeps referring to his PhD, into shreds.

I have no idea what the prospects of this book in Dallas would be but I am confident there are a few book publishers there.

But a defense of Dallas by the first critic of the official story is a switch. It is also justified.

Having this one retyped her presents no problem with the program. Any one can be used.

Thanks and best,

Harold
